

YOUSSEF AHMED

Data Analyst & AI Automation Developer

youssefahmed357402@gmail.com | +20 100 816 8639 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Data Analyst & AI Automation Developer with hands-on experience building BI dashboards, machine learning workflows, and practical automation solutions. Skilled in Python, SQL, Power BI, Excel, n8n, APIs, and LLM integrations, with a focus on turning operational data into clear insights and reducing repetitive manual work through reliable workflows.

TECHNICAL SKILLS

Data Analytics & BI: Python, Pandas, SQL, Excel, Power BI, Power Query, DAX, EDA, Data Cleaning, Data Visualization, KPI Analysis

Machine Learning: Scikit-learn, Classification, Regression, Clustering, Feature Engineering, Cross-Validation, Model Evaluation, XGBoost, LightGBM

AI & Automation: n8n, Workflow Automation, API Integration, LLM Integration, AI Agents, Prompt Engineering, Python Scripting

Tools: Git, GitHub, Streamlit, Jupyter Notebook, VS Code

EXPERIENCE

Freelance Data Analyst & AI Automation Developer | Independent Practice • 2023 - Present

Built Power BI and Excel reporting solutions with KPI tracking, DAX calculations, and structured data models for operational analysis. Cleaned, transformed, and modeled datasets using Python, Pandas, SQL, Excel, and Power Query to create dependable reporting foundations.

Developed n8n workflows integrating APIs and LLM services to automate repetitive data and communication tasks.

SELECTED PROJECTS

ApexML Studio | Python, Streamlit, Scikit-learn, XGBoost, LightGBM, Plotly, Pandas • Live Demo | GitHub

Built an end-to-end ML platform covering dataset profiling, preprocessing, feature engineering, supervised and unsupervised learning, model comparison, cross-validation, evaluation, and inference.

Implemented interactive analytics, single/batch prediction workflows, and exportable fitted pipelines to streamline model experimentation.

Fitness & Membership Analytics Dashboard | Power BI, DAX, Data Modeling, SQL

Designed an interactive dashboard that consolidates membership activity, attendance, revenue tiers, and retention indicators into a clear operational view.

Built a structured relational model and DAX measures to support branch-level filtering and KPI analysis.

Hospital Emergency Room Dashboard | Power BI, DAX, Healthcare Analytics

Created a four-page dashboard for patient volume, admissions, waiting-time patterns, satisfaction, and hourly intake analysis.

Highlighted peak intake windows and operational bottlenecks to support staffing and capacity-planning decisions.

EDUCATION & TRAINING

Menoufia National University - Faculty of Computers and Artificial Intelligence • 2022 - 2026

Major: IoT and Big Data Analysis

DEPI - Data Analysis Training | Power BI, SQL, Python, Excel, Business Intelligence

NTI - Machine Learning Training | ML Pipelines, Feature Engineering, Model Evaluation, Inference
